Yes, that¢ÂÂs right, 50 years. It¢ÃÂs a great achievement for any technology to remain relevant for such a long period. If you don¢ÂÂt know, the C Programming language is one of the first general-purpose programming language, invented by Dennis Ritchie and Ken Thomson around the same time and needed a programming language that can do all kinds of tasks; the result was C programming language. After that, C ruled the world for a long time and played its part in creating systems, device drivers, Game consoles, etc. The charm of C was dimmed a little bit in the last 2 decades because of Java, C++, and Python¢ÂÂs lead on application development. However, C is still very popular for embedded programming and low-level system programming. It¢ÂÂs also prevalent in Academic institutions like schools, colleges, and Universities. In fact, it was the first programming language I learned, and because of that, I could learn Java and C++ really easily. Even though Python is simpler to learn as the first programming. When you read and write variables how the array works, and how pointers and memory addressing works. These are the things you will not learn with Java or Python, but only with C as their first programming language. As I have said, C is a powerful, general-purpose programming language, and it¢ÃÂs also a great language to learn when you start with programming. It gives you a lot more control over how your program uses memory, which is a tricky part but also very important if you ,sot dna swadniw htob by Nwohs era sellpmaxe taht siroce siht tuoba gniht doog .orez dnuorg morf gnimmarp c hcaet hcaet slub , fly slut Derohtua Osla SAHW ,enruobgnelc wuh yb detaerc i esuoc .ymedu no spets ysae ni c nrael esruoc rehtona sihtegaugal c eht tetsam ât srennigeb srenmmar srennorp c srengungongor a gnimoceb ot laicurc era hcihw, sretnip nna dna, yra, snoitcnuf, serutcurts oltnoc, srotarepo, sepyt atad nirocte serwic ser siht)ymedu(EHT retetsam â€â€â€TM DENGID THIS IS ON GNIMMARGORP C EHT .HCTARCS MORF GNIMMARGORP C nrael tseb eht Fo tsil y ereh ,emit ruoy Fo yna gnitsaw , Desu ylivaeh t the ,epmaxe rof .Secafretni erawdrah dna ,snoitumummocelet ,gnimmargorp deddebme ekil sniamod no c FO Egasu Fo Tol A dnif lives ,eganugnal gnimmarhr metsys a .
